

WHO H3N2 Prospective Back-Test — Precision@5

Precision@5 = 0.00 for all methods.

Root cause: WHO vaccine mutations (T131K, R142G, N171K) have first_year < 2018 and are absent from per-year pools.

Limitation: model predicts novel mutations, not sweep fixations

- Random baseline (0.0088)
- Freq-based fusion score
- HI-informed F_HI (new)

Precision@5
